BYOB: Bring Your Own Bandwidth

Accent's business phone service offers complete flexibility via our "Bring Your Own Bandwidth" service delivery. Using this method, Accent delivers your phone calls over the top of your internet service as a real-time VoIP service. VoIP calls received over your internet service are then completed into your phone system and delivered to your employees as usual. This delivery method provides customers the ability to choose the best value internet service for their business while enjoying the benefits of Accent's VoIP services.

Keep your current phone system, no hardware changes needed.
